EDUCATION

Cebu Institute of Technology-University

Cebu City

Bachelor of Science in Information Technology

Graduation Date: May 2026

WORK EXPERIENCE

Metawatt LLC

Kissimmee, Florida

Development Intern

Jan 2026 - May 2026

- Designed and executed comprehensive unit tests for a NestJS backend using Jest, enhancing reliability and aligning with QA testing standards.
- Collaborated with developers and QA teams to improve testing structures through reviewed pull requests, integrating mentor feedback for long-term maintainability.
- Implemented structured test cases for API endpoints, validating functionality and ensuring compliance with product requirements.

Odysse.io

Cebu City

Software Development Intern

Oct 2024 - Dec 2024

- Executed manual testing for a custom social media platform, validating functionality and performance of web components.
- Documented test cases and bugs with detailed reproduction steps and visual evidence, fostering efficient collaboration with development teams.
- Collaborated closely with developers to verify fixes and enhance overall platform stability, contributing to improved user experience.

PROJECT EXPERIENCE

Ally — AI-Powered Legal Platform (Capstone)

Cebu City

Project Lead & Frontend Developer

Jan 2025 - Dec 2025

- Led full project lifecycle from requirements gathering to deployment, producing SRS, SDD, and SPMP documentation to define system architecture and testable workflows.
- Developed frontend features using React (Vite) with Firebase backend, including real-time chat and role-based UI flows for multiple user types.
- Coordinated team deliverables and ensured integration consistency across modules through systematic testing.

Project KODA - OJT Monitoring & GitHub Tracker

Cebu City

Backend Developer

Mar 2026 - May 2026

- Designed and developed the Issues and Issue Assignments modules in NestJS, including RESTful endpoints for CRUD operations, filtering by intern, and a dashboard feed for recent activity.
- Built GitHub OAuth and JWT authentication system with role-based access control (RBAC), supporting intern, mentor, and admin roles — covering the full auth flow from GitHub redirect to protected resource access.
- Integrated GitHub Webhooks with HMAC signature validation to process real-time repository events and sync data into the PostgreSQL database.
- Managed Supabase database migrations for multiple modules (users, repositories, issues, issue_assignments), resolving migration ordering conflicts from mixed naming conventions.

CERTIFICATIONS & ACHIEVEMENTS

Proweaver PromptQuest Hackathon (2025) - 3rd Place

AWS Academy Graduate - Cloud Foundation - Training Badge

AWS Academy Graduate - Cloud Architecting - Training Badge

TESDA AI Training Certificate

SKILLS & INTERESTS
